

# Cybersecurity Discussion Cases

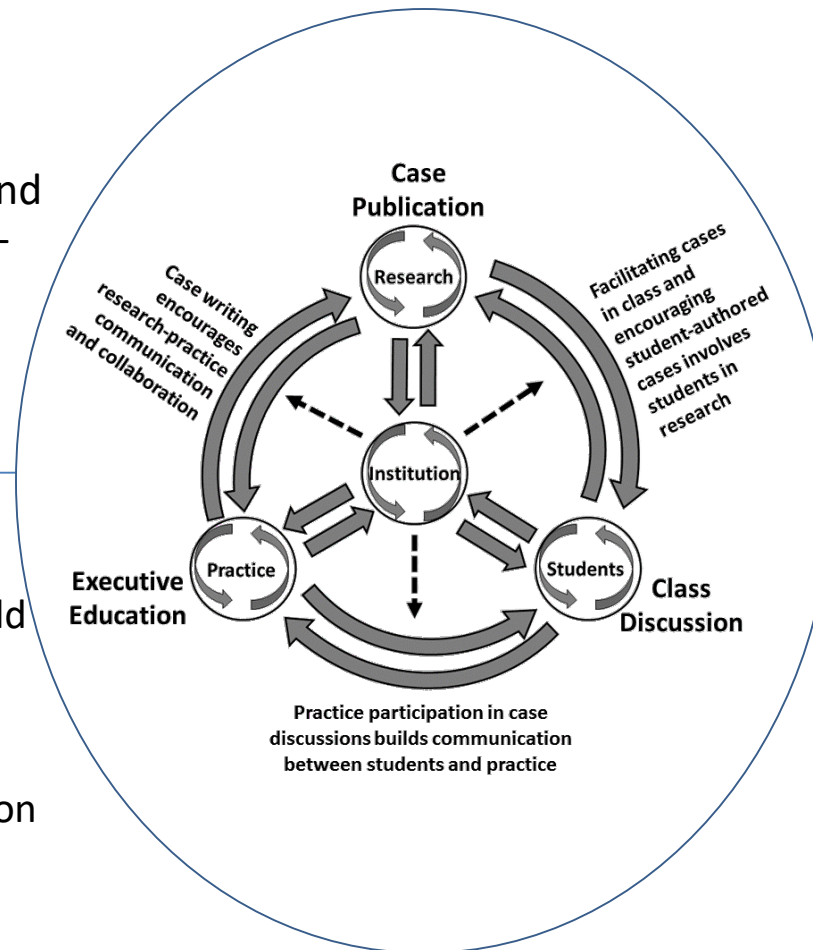

## Challenge:

- Building students and policy-maker cybersecurity judgment.

## Solution:

- Developing real world case studies
- Training faculty & students in case-writing and facilitation

## Scientific Impact:

- The project should serve to enhance the decision-making of IT graduates in cybersecurity and non-cybersecurity positions
- Helps researchers identify problems and decisions with practical interest

## Broader Impact:

- Better cybersecurity decision-making can reduce frequency and magnitude of foreseeable events
- Case writing builds bridges from research to practice
- Publication of cases and online training provide free resources for instructors
