# TWC: Small: Collaborative:

# **Cracking Down Online Deception Ecosystems**

### **Challenges:**

- 1. Existing techniques unable to curb organized online fraud
- 2. Fraud originates from resourceful human workers
- 3. Insufficient fraud behavior data
- 4. Highly dynamic online services

#### Scientific Impact:

- 1. Reveal unique fraud innovations and behaviors of fraudsters
- 2. Combine linguistic and graph methods to group fraud creators
- 3. Pave the way to fraud attribution: identify fraud promoters and creators

# Solution:

- 1. Study fraudulent behaviors at intersection of crowdsourcing sites and online services
- 2. Collect and publish gold standard attributed fraud
- 3. Design **FairPlay** system to differentiate fraudsters from honest users
- 4. Design light-weight visualizations that help the user avoid fraudulent products

NSF 1527153, FIU, Bogdan Carbunar NSF 1526254, Georgia Tech, Polo Chau

# **Broader Impact:**

- 1. Protect people from
- fake reviews, news
- malware
- 2. Sub-projects used in REU and RET programs at FIU, GT
- Established collaboration with K-8 teacher and students at Norman S. Edelcup/Sunny Isles Beach K-8 school
