

PECCS 2012

Submitted by [Katie Dey](#) on Mon, 04/16/2012 - 7:17pm

[Feb 24, 2012 10:45 pm - Feb 26, 2012 10:45 pm CET](#)

The 2nd International Conference on Pervasive and Embedded Computing and Communication Systems

Pervasive and embedded computing and communication is a paradigm that aims at providing trustworthy computing solutions and communication services all the time and everywhere. This entails the need for an interdisciplinary field of R&D that combines signal processing with computer hardware and software technologies, and utilizes and integrates pervasive, wireless, embedded, wearable and/or mobile systems. Applications range from ambient intelligence to ubiquitous multimedia, multidimensional signal processing, sensors, robotics, integrated communication systems and nanotechnologies. PECCS will bring together researchers, engineers and practitioners interested in the theory and applications in these areas

Program Co-Chairs

- César Benavente-Peces, Universidad Politécnica de Madrid, Spain
- Falah Ali, Sussex University, U.K.

Keynote Speakers

- [Jay Lee](#), University of Cincinnati, U.S.A.
- [Kin K. Leung](#), Imperial College, U.K.
- [Juan Carlos Augusto](#), University of Ulster at Jordanstown, U.K.
- [Joseph Sifakis](#), Verimag, France
- [Pedro José Marrón](#), University of Duisburg-Essen, Germany

Event Details

Location: Rome, Italy
