Application of Concurrency to System Design 2017: (extended deadlines!) abstracts due Jan 27

Submitted by Anonymous on Fri, 01/20/2017 - 12:03pm

CALL FOR PAPERS AND ANNOUNCEMENT

17th International Conference on Application of Concurrency to System Design (ACSD 2017)

IMPORTANT DATES

submission deadline (abstracts): January 27, 2017
submission deadline (papers): February 3, 2017
notification of acceptance: March 17, 2017
camera-ready submission deadline: April 15, 2017
conference sessions: June 26-30, 2017

CONFERENCE SCOPE

The conference aims at cross-fertilizing both theoretical and applied research about formal approaches (in a broad sense) to designing computer systems that exhibit some kind of concurrent behaviour. In particular, the following topics are of interest:

* Formal models of computation and concurrency for the above systems and problems, like data-flow models, communicating automata, Petri nets, process algebras, graph rewriting systems, state charts, MSCs, modal and temporal logics
* Compositional design principles like modular synthesis, distributed simulation and implementation, distributed control, adaptivity, supervisory control
* Algorithms and tools for concurrent systems, ranging from programming languages to algorithmic methods for system analysis and construction, including model checking, verification, and static analysis techniques as well as synthesis procedures
* Synchronous and asynchronous systems on all design levels:
polychronous systems, endochronous systems, globally asynchronous locally synchronous systems
* Cyber-physical systems, hybrid systems, networked systems, and networks in biological systems
* High-performance computer architectures like many-core processors, networks on chip, graphics processing units, instruction-level parallelism, dataflow architectures, up to ad-hoc, mobile, and wireless networks
* Memory consistency models for multiprocessor and multicore architectures, replicated data, including software and hardware memory models, DRAM scheduling, cache coherency, memory-aware algorithms
* Real-time aspects, including hard real-time requirements, security and safety-critical issues, functional and timing verification
* Implementation aspects like resource management, including task and communication scheduling, network-, memory-, and power-management, energy/power distribution, fault-tolerance, quality of service, scalability, load balancing, power proportionality
* Design principles for concurrent systems, in particular hardware/software co-design, platform-based design, component-based design, energy-aware design, refinement techniques, hardware/software abstractions, cross-layer optimization
* Business process modelling, workflow execution systems, process (de-)composition, inter-organizational and heterogeneous workflow systems, systems for computer-supported collaborative work, web services
* Case studies of general interest, from industrial applications to consumer electronics and multimedia, automotive systems, (bio-)medical applications, neuromorphic applications, internet (of things) and grid computing, to gaming applications.

**PAPER SUBMISSION**

ACSD seeks papers describing original work which has not been previously published and is not under review for publication elsewhere. All files must be prepared using the latest IEEE Computer Society conference proceedings guidelines (8.5" x 11" two-column format). The page limit for regular papers is 10 pages.

In addition to regular submissions, there will be a tools section. Tools will be presented at the conference in an interactive session. Related papers describe a tool, its functionality and interfaces as well as the underlying algorithms and implementation aspects. These tool papers are limited to 6 pages.

Conference proceedings will be published on IEEE Xplore Digital Library. Accepted regular and tool papers will be included in the conference proceedings. At least one authors of each accepted contribution is expected to present the paper or tool at the conference, and will be required to sign the IEEE copyright release forms.
Several papers will be considered for publication in extended and revised form in a special issue of a journal. All papers have to be submitted via EasyChair: https://easychair.org/conferences/?conf=acsd2017

STEERING COMMITTEE
Alex Yakovlev, UK (chair)
Alex Kondratyev, USA
Benoit Caillaud, France
Luciano Lavagno, Italy
Jordi Cortadella, Spain
Antti Valmari, Finland
Jorg Desel, Germany

PROGRAM COMMITTEE CHAIRS
Alex Legay, France
Klaus Schneider, Germany

PROGRAM COMMITTEE
Mohamed Faouzi Atig, Uppsala University, Sweden
Saddek Bensalem, VERIMAG, France
Hanifa Boucheneb, Ecole Polytechnique de Montreal, Quebec, Canada
Jens Brandt, University of Applied Sciences, Niederrhein, Germany
Benoit Caillaud, IRISA/INRIA Rennes, France
Josep Carmona, Universitat Politecnica Catalunya, Spain
Franck Cassez, Macquarie University, Australia
Rocco De Nicola, IMT - School for Advanced Studies Lucca, Italy
Jorg Desel, Universitst Hagen, Germany
Uli Fahrenberg, Ecole polytechnique, Palaiseau, France
Jose Luiz Fiadeiro, Royal Holloway, University of London, UK
Gilles Geeraerts, Universite libre de Bruxelles, Belgium
Stefan Haar, INRIA Saclay/LSV, ENS Cachan, France
Rene Rydhof Hansen, Aalborg University, Denmark
Arnd Hartmanns, University of Twente, The Netherlands
Radha Jagadeesan, DePaul University, USA
Gabriel Juhas, Slovak University of Technology Bratislava, Slovakia
Jan Kretinsky, Masaryk University, Czech Republic
Daniel Kroening, University of Oxford, UK
Axel Legay, IRISA/INRIA, Rennes, France
Johan Lilius, Abo Akademi University, Finland
Tiziana Margaria, University of Limerick, UK
Roland Meyer, University of Braunschweig, Germany
Andrey Mokhov, Newcastle University, UK
Dejan Nickovic, Austrian Institute of Technology AIT, Austria
Doron Peled, Bar Ilan University, Israel
Marta Pietkiewicz-Koutny, Newcastle University, UK
Jean-Baptiste Raclet, IRIT, France
Klaus Schneider, University of Kaiserslautern, Germany
Deadline Extended (Jan 24): Work in Progress session of RTAS'17
