

Matlab Version

Submitted by [Simmu](#) on Tue, 02/21/2017 - 7:31am

Hi there!!

I am facing difficulty in Matlab version. Provided Matlab-Simulink files are created in the latest version of matlab-R2016. But our institutions have the license of matlab-2015. So I am unable to open that Simulink's files provided by you. I request you to please export the files in the older version or provide us the license of the latest version of Matlab. Thanks in advance.
