

# ACM Workshop on Information Hiding and Multimedia Security

Submitted by [grigby1](#) on Mon, 04/10/2017 - 12:17pm

[Jun 20, 2017 12:00 am - Jun 22, 2017 12:00 pm EDT](#)

"This workshop is one of the premier conferences in the area of multimedia security, and it attracts researchers from all over the world. The workshop focuses on information hiding topics, such as watermarking, steganography, steganalysis, anonymity, privacy, hard-to-intercept communications, and covert/subliminal channels. It also focuses on a variety of multimedia security topics including multimedia identification, biometrics, video-surveillance, multimedia forensics, and computer and network security. The research presented at this workshop captures the state-of-the-art of research conducted in academic, industrial, and government institutions around the world. The papers cover the theoretical aspects of the field as well as the industrial and commercial applications of techniques and algorithms developed in this area. Researchers are hereby invited to participate and submit the results of their cutting edge research for publication at this workshop."
