Biography

Karl-Erik Arzen is Professor in Automatic Control at Lund University, Lund, Sweden. He received his PhD in 1987 from the same university and since then also worked for ABB Corporate Research. Arzen's research lies in the intersection of control engineering and embedded real-time systems, with a special emphasis on co-design of control and computing systems, and on feedback computing for embedded systems. Arzen has been strongly involved in the European Networks of Excellence Artist2 and ArtistDesign on embedded system design as well as participated in several EU STREP and IP projects. His main connections to CPS are

- 1) Member of the steering committee of ICCPS
 - 2) PC Track Chair for CPS at Real-Time Systems Symposium 2011
 - 3) Member of CPS panels at several CPSWEEK conferences.
