

"HolaVPN Is a Massive Security Risk, Security Researchers Warn"

Submitted by [grigby1](#) on Thu, 12/27/2018 - 3:30pm

Trend Micro Inc. recently warned of the significant security risks posed by the widely-used virtual private network provider, HolaVPN. Users are urged to cease their use of HolaVPN as the data sent via this service has been found to be unencrypted. This article continues to discuss other major security risks that are presented by HolaVPN to its users.
