

"AI Advancement Opens Health Data Privacy to Attack"

Submitted by [grigby1](#) on Tue, 01/01/2019 - 2:44pm

A new study conducted by researchers at UC Berkeley highlights the creation of new threats facing the privacy of health data. These new threats stem from the advancements in artificial intelligence (AI). Researchers suggest that current laws and regulations should be bolstered to protect health data as new threats are formed by AI. This article continues to discuss the study and what its results suggest.
