

"PewDiePie Hackers Take Aim at Chromecast TVs"

Submitted by [grigby1](#) on Fri, 01/04/2019 - 5:02pm

The two hackers that were able to hijack poorly secured printers to print messages aimed at promoting a popular YouTuber are now targeting Chromecast TVs. Routers with the Universal Plug and Play (UPnP) protocol enabled were exploited to take control of Chromecast TVs and play videos on the devices in promotion of their favorite YouTuber, PewDiePie. This article continues to discuss the latest campaign targeting connected TVs.
