

# "To Reduce IT Supply Chain Risk, Watch for Insider Threats and External Attackers"

Submitted by [grigby1](#) on Tue, 01/08/2019 - 2:23pm

Recent claims surrounding the infiltration of the U.S. technology supply chain by China's military to conduct espionage call for public and private sector organizations to take further action to reduce IT supply chain risks. Organizations are urged to inspect vendors, address insider threats, manage software vulnerabilities, and increase education in defense of the IT supply chain. This article continues to discuss the alleged infiltration of the U.S. supply chain by Chinese spies and the reduction of IT supply chain risks.
