

Call for Papers ECBS 2013

Submitted by [sprinkle](#) on Wed, 10/24/2012 - 6:40pm

ECBS provides a bridge between industry and academia, blending academic research and industrial developments. Papers are sought which reflect the main theme or societal and environmental impact, as well as the following thematic tracks:

- Adaptive Computing & Autonomic Systems
- Embedded Systems (Real-time systems, Reconfigurable and embedded computing)
- Model-based Technologies (Simulation and validation, domain-specific modeling, model transformations)
- Systems Integration and Complexity (Verification and validation)
- Industrial Experience Reports and Applications
- Smart/Green Computing Systems

Workshops

As in the previous years, ECBS 2013 offers to host workshops. Please contact the organizers (ecbs2013@ECE.Arizona.Edu) for more information.

Poster Sessions

Posters and abstracts presenting work in progress are invited for a poster session. Accepted abstracts will be published in the proceedings. Graduate students are especially welcome to participate.

Doctoral Symposium

The Doctoral Symposium provides a forum for PhD candidates to present work in progress and get feedback from the research community while also publishing a full paper in the IEEE proceedings.

Industrial Track

The industrial track provides a forum for short papers on results of industrial research and development, combining the various themes mentioned above. Industrial track papers should emphasize the case study and results, and may be shorter than research papers.

Submission of Papers

Full papers and Doctoral Symposium papers must be 6 to 10 pages in Computer Society Format, posters 5 pages max and industrial track papers 2 to 4 pages. Papers must be submitted via EasyChair and are requested to be allocated to one of the defined ECBS tracks. For further information see the submission guidelines on the conference web site.

Best Paper Awards

For Full Papers and Doctoral Symposium Papers, the Program Committee will select a best paper award.

Important Dates

Submission of all papers:	1 January 13 January 2013
Notification of acceptance:	31 January 7 February 2013
Camera-ready material for publication:	20 February 2013
Registration deadline for authors:	20 February 2013
Early registration deadline for non-authors	1 March 2013

Submission dates for workshop papers may differ, so please check separate Calls for Papers on the workshop websites.
