

# "More than 2 million cyber incidents in 2018 created \$45 billion in losses"

Submitted by [aekwall](#) on Thu, 07/11/2019 - 1:57pm

In 2018, the financial impact of ransomware rose by 60%, losses from business email compromise doubled, and cryptojacking incidents more than tripled, even though the overall amount of breaches and exposed records were down in 2018. This data shows that cybercriminals are getting better at monetizing their activities. In 2018 there were 2 million cyber incidents, and created 45 billion dollars in losses.
