

The 6th IEEE International Conference on Collaboration and Internet Computing (Online)

Submitted by [grigby1](#) on Tue, 04/28/2020 - 3:46pm

[Dec 01, 2020 12:00 am - Dec 03, 2020 12:00 pm EST](#)

"Internet has revolutionized the globalized society and enabled the growth of infrastructures, applications, and technologies that significantly enhance global interactions and collaborations that have significant impact on society. Unprecedented cyber-social, and cyber-physical infrastructures and systems that span geographic boundaries are possible because of the Internet and the growing number of collaboration enabling technologies. Individuals and organizations have increasingly relied on electronic and/or Internet-enabled collaboration between distributed teams of humans, computer applications, and/or autonomous robots to achieve higher productivity and produce collaboratively developed products that would have been impossible to develop without the contributions of multiple collaborators. IEEE CIC has been conceived as the key multidisciplinary venue to serve as a premier international forum for discussion among academic and industrial researchers, practitioners, and students interested in Internet technologies, applications and services, collaborative networking, technology and systems, and applications."

Features talks on cybersecurity and privacy.
