

Journal of Sensitive Cyber Research and Engineering (JSCoRE)

Submitted by [brad_martin](#) on Wed, 11/27/2013 - 4:19pm

A new journal providing for a peer-reviewed, high-quality

venue for publishing sensitive cybersecurity research results; and to make information readily available as appropriate for the sensitivity of the information to a wide-variety of government, academic, and industrial partners. JSCoRE will further provide for the dissemination, review, and reuse of ideas enabling the advancement of science, as well as recognition of the contribution of individuals.

An updated Call for Papers and submission instructions for Volume 2 will be available shortly at <http://cybersecurity.nitrd.gov/jscore>.

The Journal of Sensitive Cyber Research and Engineering (JSCoRE) is an initiative of the Federal Special Cyber Operations Research and Engineering (SCORE) Interagency Working Group which coordinates research activities related to national security systems.
