Against Coordinated Cyber and Physical Attacks: Unified Theory and Technologies

Xiaofeng Wang¹, Naira Hovakimyan², Lui Sha³, and Petros Voulgaris⁴

¹College of Engineering and Computing, University of South Carolina ²Department of Mechanical Science and Engineering, ³Department of Computer Science, ⁴Department of Aerospace, University of Illinois at Urbana--Champaign

- physical dynamics and observations
- damage, assuming control software and sensor data are not compromised

Goal: Unified models and techniques with coherent set of assumptions, supported by

SAMPLED-DATA DRIVEN DETECTION AND

- time instances with different rates.
- zeros), which make the control systems susceptible to stealthy attacks.

2019 NSF Cyber-Physical Systems Principal Investigators' Meeting November 21-22, 2019 | Crystal City, Virginia

Award ID#: ECCS-1739732, ECCS-1739886
