

CPS

One Future Application (and Challenges)

Jack Stankovic
University of Virginia

Questions

- *How many sensors?*

Tens of trillions

- *Where will they be?*

Around the body, on the body
and in the body

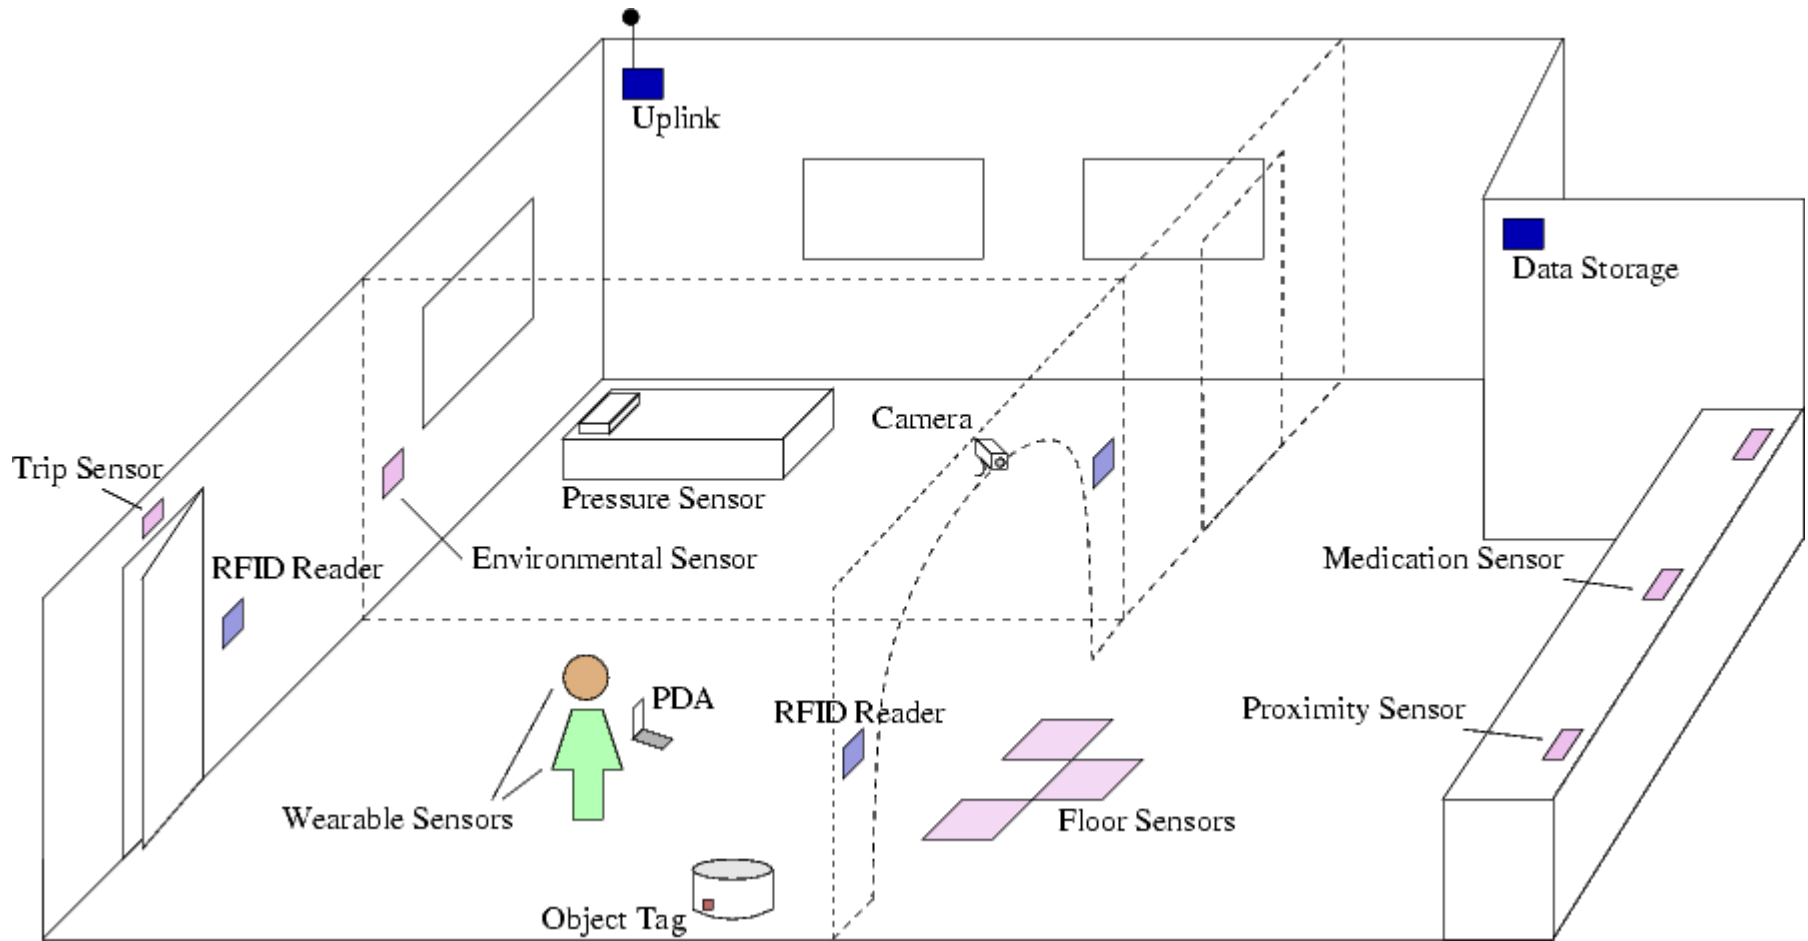

Virtual Life Partner

- Continuous Birth-to-Death Health Care
- Personal Safety
- Happiness

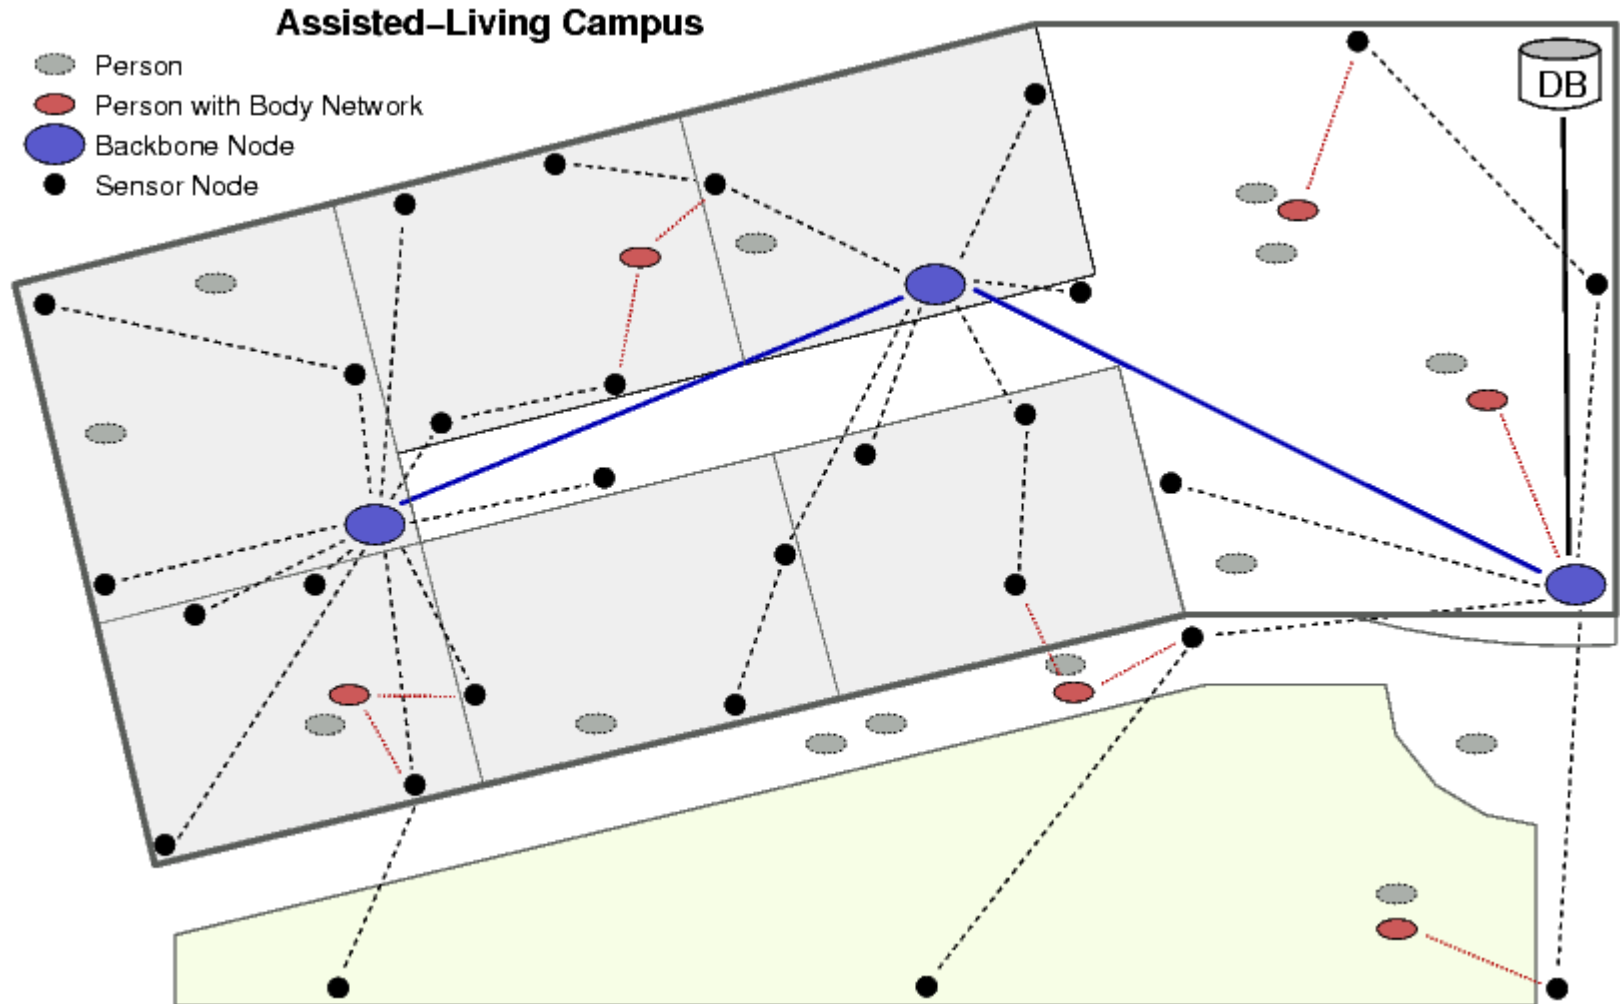

Smart Health Aware Spaces

Large Scale Deployments

Global Scale

- Across "all" people, homes and health care facilities
- Preliminary diagnoses without doctor's visit
- Lifelong medical records (HealthVault)
- Holistic health care and quality of life

Research Challenges

- From Raw Data to Knowledge
 - Finding the knowledge
 - Trust the data
- Robust System Operation
- Privacy
- Security
- Certification and Runtime Validation
- Openness

Openness Challenges

- Account for openness in
 - Dynamic Compositional Theory
 - Analysis Techniques
 - Tools
 - Communication
 - Security
 - Privacy

Example - Openness

- Current Feedback Control
 - Model "closed" system and derive controller to meet stability, overshoot, settling time
- Open System
 - Model keeps changing
 - Human behavior models
 - Errors, noise, missing data is the norm
 - Interactions of control loops (within and across systems)
