

Excellence in Research - The Impact of Cybersecurity Policies on Employees' Efficiency and Performance Predictability

Challenge:

- Measuring employees' efficiency and performance predictability as a result of cybersecurity policies instituted by an organization.

Solution:

- Conduct qualitative interviews with students @NSU and Employees in Hamptons Roads, VA.
- Create Socio-Cybersecurity App for Simulated Interviews.

Scientific Impact:

- Establish interdisciplinary research between sociology and computer science/cybersecurity.
- Broaden the perspective cybersecurity in modern businesses.
- Extend the sociological literature by examining the role of cybersecurity in organizations.

Broader Impact and Broader Participation:

- To establish an active research program in a social science department at a HBCU
- To establish an interdisciplinary research framework
- Contribute to increased institutional prestige
