

# JST's priorities and initiatives in robotics research

SHIMADA Kazuyoshi, Ph.D  
Director, Washington, D.C. Office  
Japan Science and Technology Agency

2022.4.21 @ NSF NRI/FRR Panel

A mission-oriented funding agency, implementing Japan's national Science, Technology and Innovation (STI) policies\*.

**\*Science, Technology, and Innovation Basic Plan etc.**

Dr. Kazuhito Hashimoto  
President of JST  
(since April 1, 2022)

## Science, Technology and Innovation Basic Plan

- Implementation of Society 5.0
- 'Convergence of knowledge' for innovation and human well-being
- R&D investment for 5 years

## MEXT's Strategic Objectives (AI & Robotics fields)

- [2022] Creation of fundamental technologies to analyze human and society for Society 5.0
- [2021] System software technology to support safety, security, and trust in the era of Society 5.0
- [2020] Trusted AI
- [2019] Creating information utilization platform by integrating mathematical and information sciences, and development to society
- [2019] Fundamental technologies for next-generation IoT (Internet of Things) to create a future smart society
- [2018] Creating Technology for Computing Revolution for Society 5.0
- [2017] Advanced Interaction Technologies within Networked Intelligent Information Environment

A human-centered society that balances economic advancement with the resolution of social problems by a system that highly integrates cyberspace and physical space.

## Economic advancement

- The demand for energy is increasing
- The demand for foodstuffs is increasing
- Lifespan is becoming longer, and the aging society is advancing
- International competition is becoming increasingly severe
- Concentration of wealth and regional inequality are growing

## Resolution of social problems

- Reduction of GHG emissions
- Increased production and reduced loss of foodstuffs
- Mitigation of costs associated with the aging society
- Promotion of sustainable industrialization
- redistribution of wealth, and correction of regional inequality

Incorporating new technologies such as IoT, robotics, AI, and big data in all industries and social activities, provide goods and services that granularly address manifold latent needs without disparity

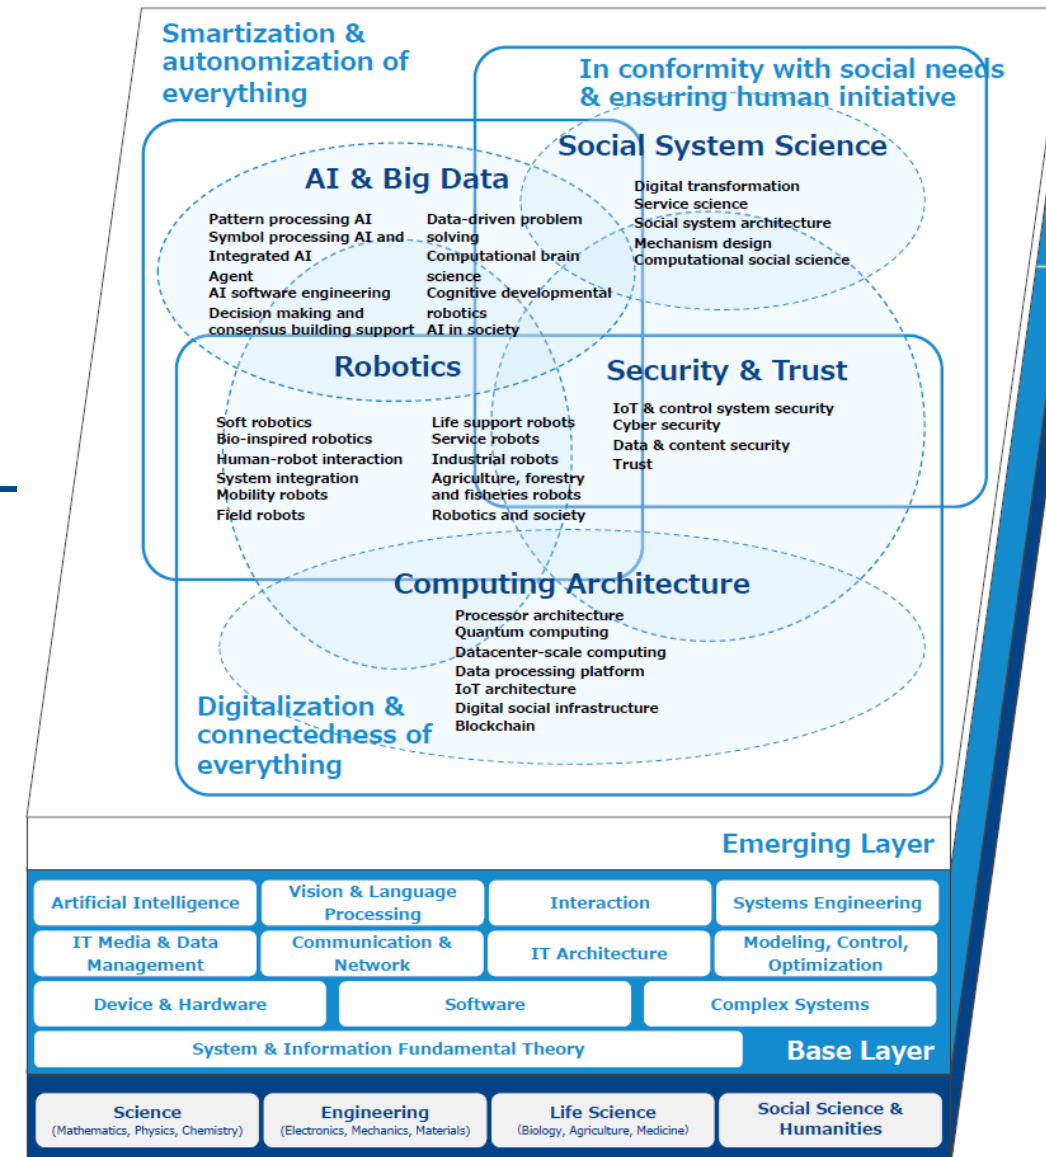

to **balance** economic advancement with the resolution of social problems

## Vision:

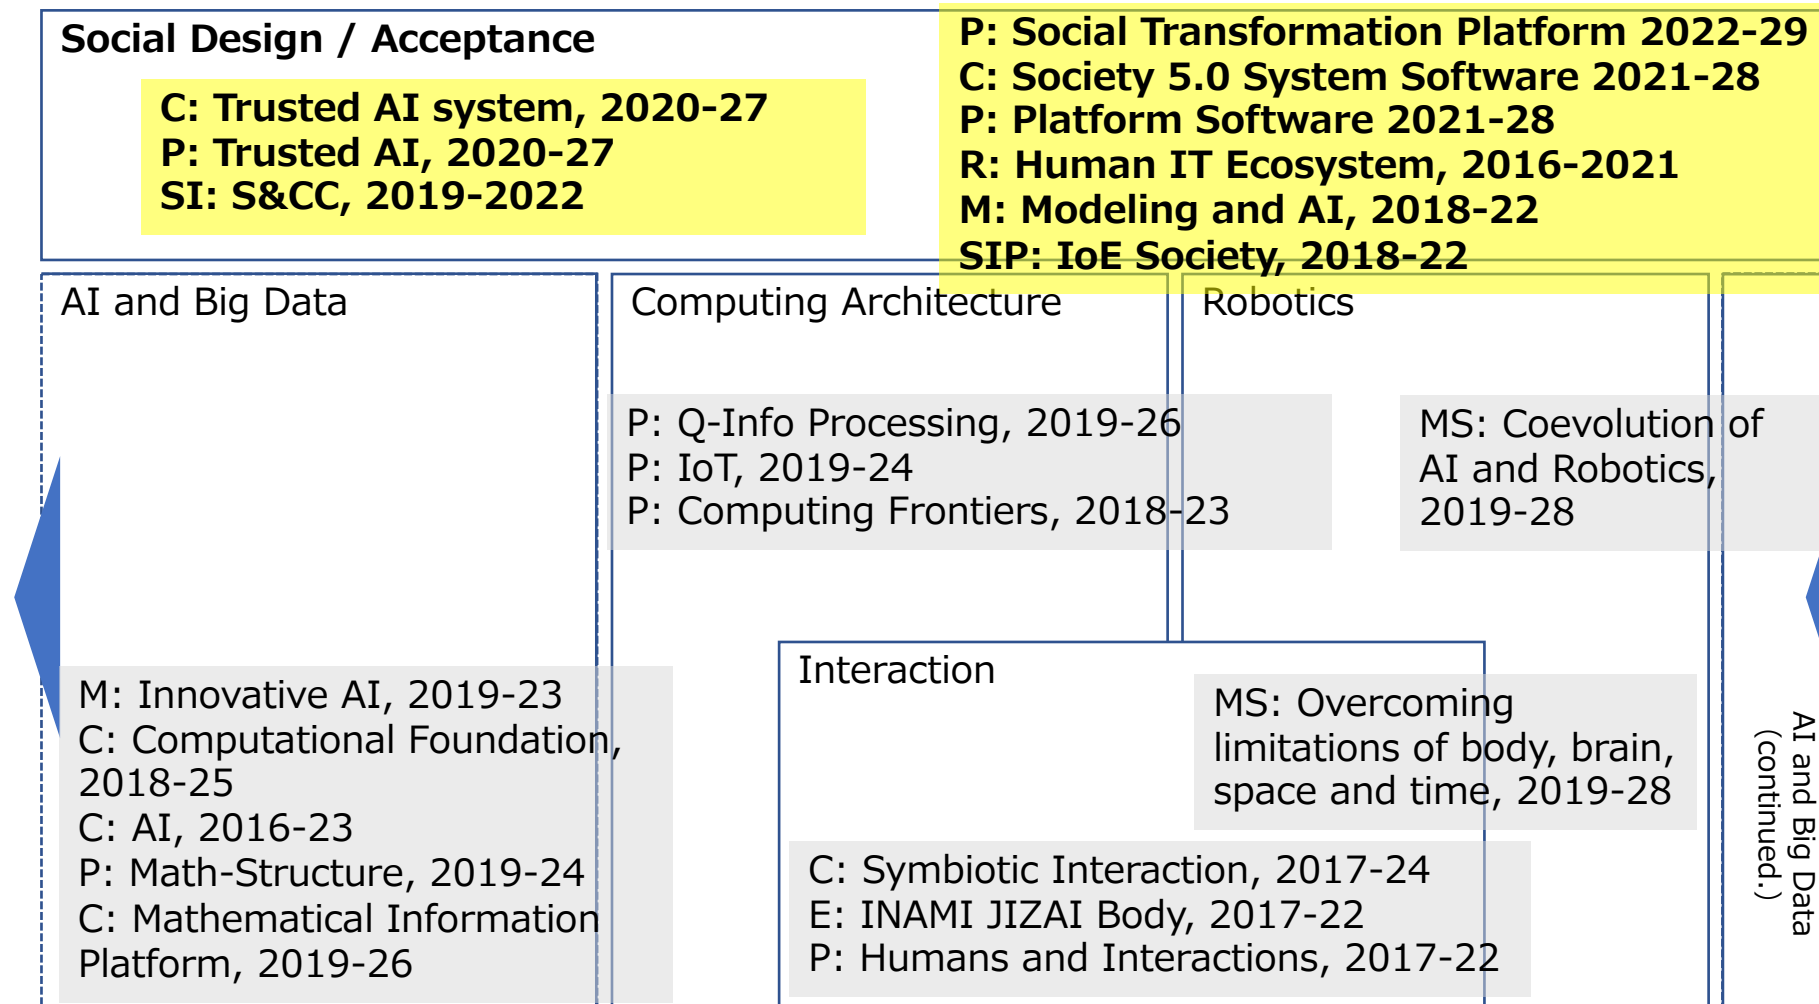

- Advanced integration of the cyber and physical worlds
- Data-driven and knowledge-intensive value creation
- Solving social issues and realizing a human-centric society

## Technological trends:

- Digitization & connectedness of everything
- Smartization & automation of everything
- In conformity with social needs & ensuring human initiative

# Engagement Initiative with NSF

Initiated by **Dr. Panchanathan**, the director of NSF, and **Dr. Hamaguchi**, the (former) president of JST (Since 2021).

## Four thematic pillars of collaboration

1. AI and Robotics
2. Quantum science
3. Resilience
4. Millennial generation exchange

## Objective

- Strengthen JST- and NSF- funded research and maximize outcomes.

## Workshop(s)

- Exploring new research agendas connecting Artificial Intelligence, Robotics, Humanities and Social science (February 1&7, 2022)

Thank you for your attention!

You can find JST-funded researchers for your collaboration  
at the following website:
