

CEEMS – Cyber Enabled Energy Management of Structures

Tyrone Vincent, Robert Braun, Dinesh Mehta, Kevin Moore, Sid Suryanarayanan,
Marcelo Simoes, William Hoff

Supported by NSF Grant CNS-0931748

Application area: Buildings as cyber-physical systems with multiple, interacting networks

- Simulation and Optimization for Buildings and Integrated Energy Systems
- Cyber Enabled Building Energy Management Systems
- Activity Recognition
- Interconnected Dynamic Systems – Identification and Control
